

I-80 SMART CORRIDOR PROJECT

FALL 2015

Improving Safety and Mobility Along the I-80 Corridor

THE NEED

Interstate 80 (I-80), an integral part of the San Francisco Bay Area transportation network and a major route for commuters and transit services, is crucial for the transport of goods into and out of the region.

Currently, when an incident occurs, unexpected traffic jams cause secondary accidents, worsening congestion, impacting incident recovery times and making travel times unpredictable.

THE PROJECT

The California Department of
Transportation (Caltrans), Alameda County
Transportation Commission (Alameda
CTC) and Contra Costa Transportation
Authority (CCTA), in cooperation with the
nine cities and two transit agencies along
the corridor, are implementing the I-80
SMART Corridor project, an Intelligent
Transportation System (ITS) that will
improve travel time reliability and reduce
accidents and associated congestion.
ITS is the integration of communication
technologies into the transportation
infrastructure to improve safety and
mobility. By giving drivers accurate, real-

As many as 270,000 vehicles per day use the I-80 corridor, currently one of the most congested in the San Francisco Bay Area. This project focuses on the I-80 corridor and San Pablo Avenue from the Carquinez Bridge to the Bay Bridge within Alameda and Contra Costa counties.

time information, along with managing traffic, I-80 will be optimized to move vehicles and people in a safer and more efficient manner, without requiring the construction of new lanes or the widening of existing ones.

PROJECT AREA

PROJECT SCHEDULE

INTERSTATE 80 IMPROVEMENTS

Construction Began LATE 2012

System Integration / Project Operational Spring 2016

SAN PABLO AVE. IMPROVEMENTS

Construction Began SEPTEMBER 2012

Construction Completed SEPTEMBER 2014

Using Technology to Reduce Congestion is SMART

(SAFETY • MOBILITY • AUTOMATED • REAL-TIME • TRAFFIC MANAGEMENT)

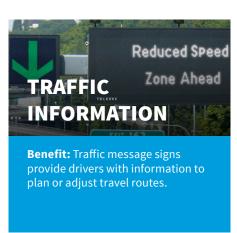

The I-80 SMART Corridor project maximizes the efficiency of the existing transportation network, smoothing traffic flow and leading to improved safety and reduced travel times.

The project includes the following elements and associated intelligent transportation technologies along I-80 and San Pablo Avenue:

For more information on how these ITS technologies work in unison, view a project video at **www.80smartcorridor.org**.
